Tips for Secure Online Banking

- The Bank will NEVER ask for any confidential information (including user id/passwords) over email or phone call;
- DO NOT respond to web-form in e-mails, that ask for your NetBanking or email user id/passwords, ATM card number or PIN, Date of Birth, Mobile Number etc.;
- NEVER use a link in an email to log on to NetBanking. Type the URL directly into your browser's address bar to ensure that you are accessing correct web page;
- DO NOT open e-mail attachments from unverified/unexpected sources or instant message download links. Delete such suspicious e-mail messages immediately;
- DO NOT access NetBanking or make payments from shared or unprotected computers in public places and Cyber Cafes;
- Setup either email and/or SMS ALERTS on your NetBanking for all transactions on your account(s);
- Create a STRONG password using a combination of alphabets (lowercase and UPPERCASE), numbers and special characters;
- Ensure that you proactively and immediately notify to YES BANK, in cases employees who had access to NetBanking have left the organization and/or the employee no longer requires NetBanking access rights. It is recommended that this practice be embedded with the exit/transfer formalities of the employees.
- Ensure that you have installed the latest anti-virus/anti spyware/personal firewall/security patches on the systems used for accessing NetBanking;
- Choose a NetBanking password that is easy to remember but difficult for others to crack; always have a separate password for Account(s) and your personal email account and social networking sites;
- Do not store your NetBanking password on your mobile phone or computer
