

Instruction for Registration and verification of YES SECURE-Mobile App Authentication

Login to YES BANK's Retail NetBanking and go to: Update profile >Manage Transaction Authentication Mode > select YES SECURE-Mobile App authentication

On landing on the YES SECURE-Mobile App authentication page follow the below steps:-

Step 1: Select your device OS to download YES SECURE Mobile App.

- Android
- IOS
- Windows(desktop only)

Step 2: Set Your YES SECURE PIN: Please enter a six digit numeric PIN of your choice which will be used each time you need to generate OTP from YES SECURE

Step 3: Download and Activate YES SECURE

On successful setting of YES SECURE PIN, an SMS will be sent to your registered mobile number with two separate links for downloading and activating YES SECURE respectively.

First, click on the download link to download the YES SECURE Mobile App. Post successful download, click on the activation link to activate the YES SECURE Mobile app.

Step 4: Verify YES SECURE

Generate OTP on your mobile handset using the YES SECURE Mobile App. Enter this OTP in 'Verify YES SECURE' option on Retail NetBanking.

Follow the below steps to generate OTP on your YES SECURE app.

- 1.Open YES SECURE APP on your device
- 2.Enter YES SECURE PIN which you have set in step2.
- 3.Enter the Authorization code displayed on Net banking page, in YES SECURE Mobile App and generate OTP.

Now enter the OTP generated on YES SECURE app, in Retail NetBanking page in OTP text box and click on submit.

On successful authentication, you will get a success confirmation text on screen.

Post following the above steps, your two factor authentication is now successfully changed to YES SECURE-Mobile app authentication and you can use the OTP generated on your device to authenticate your net banking transactions.
